- ❖ English CEFR: C1(Advanced)*
- ❖ IT & Ruby upper-intermediate ;)

“ Currently, I'm looking for any relocation opportunity. Preferred destination: any location in the United Kingdom. Will gladly consider a temporary job in Kyiv/Europe with relocation prospects.

RECOMMENDATIONS

“ Serge is a true geek with great knowledge and "get things done" mindset. He is very passionate about automation the routine which is essential for every software engineer. It was great to work together and build a strong team in the company.

I would recommend Serge as a good performer who strongly values the quality of his work and can deliver the results in a predictable manner.

Dmitriy Scherbina

Delivery Director at Rails Reactor

Worked directly with Serge at LevelUp games

“ I know Sergey as a talented, smart and experienced programmer with a very high skills in computer science. He's a good architect, very attentive to details, knows peculiarities of realization of technologies used. He is always open to innovations and is able to wisely implement them to optimize the project if needed.

I also know Sergey as a person with very good leadership qualities being a great person to take after. So if you are considering to offer Sergey a job - don't hesitate a minute! You can get a great experienced team player!

Igor Yemelyanov

Software Engineer at BetInvest Ltd.

Worked with Serge at LevelUp games

“ I'd describe Sergey as a product of fusion of a Skilled Programmer and a DevOps specialist who also has a lot of knowledge and experience in software architecture design and managing development teams. He is always keen and enthusiastic about finding the best and newest solution for the task in the least amount of time while considering actual resources at hand, and even if there aren't any he always manages to find a workaround. I truly enjoyed cooperation with him which was all about true work ethics, continues support, fresh approaches and interesting tasks resulting in great products.

Yurii Akop

Senior Test Engineer, Quality Assurance

Reported to Serge at LevelUp games

RECOMMENDATIONS

“ I worked with Serge for 1.5 years in Levelup company. He creates really quality and clean code, knows modern approaches and technologies, always open for advice giving and receiving. He is an awesome team leader. I know it because observed in real life how he handles conflicts and motivates his team. I think highly about Serge and absolutely recommend him as specialist .

Oleg Gorbunov

Ruby developer

Worked with Serge at LevelUp games

“ Sergey showed himself as a highly qualified backend developer. He is familiar with the various development techniques (extreme programming) and always open to learning new technologies.

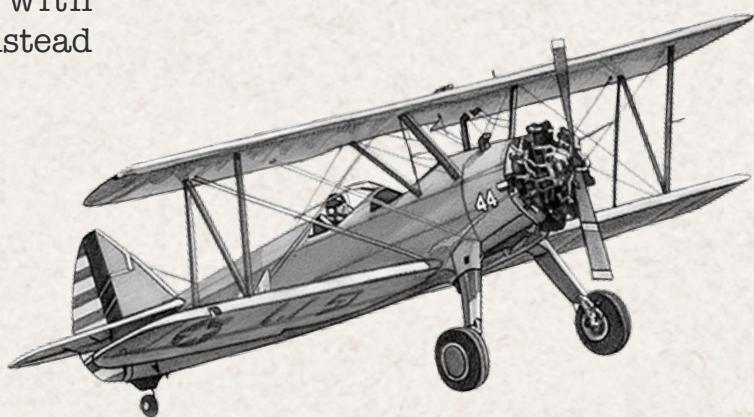

Dmitry Payareli

Full-Stack Developer at Beetroot Resources

Worked with Serge at Netpeak

“ If you prefer Agile to working software – we aren't going to be friends. If you prefer talking to working – we aren't going to be friends. If you prefer charts & burndowns to unit-tests – we aren't going to be friends. If you prefer pure theory to practice or logical tasks to work experience – well, you've got the idea... My goal is to create great products with passionate, smart, adventurous people instead of working for money 9-to-5.
